

Mosque Prayer

User manual – find your mosque, never miss the congregation

1. Getting started

1. Install the Mosque Prayer app, or open **prayertimer.zatgoinnovation.com** in your browser.
2. You can browse mosques without an account. To save a Home Mosque and favourites, tap **Profile → Create account** and sign in.
3. Choose your language any time: **Profile → Language** (English, മലയാളം, हिन्दी, தமிழ், العربية). On the website use the language menu at the top.

2. Home – your Home Mosque

- Your **Home Mosque** is shown on the **Home** tab with today's adhan and iqamah times and a live countdown to the next prayer and next iqamah.
- To set it, open any mosque and tap **Set as Home Mosque**. You can change it whenever you like.
- On **Fridays** a **Jumu'ah** row appears after Dhuhr. Its adhan time is the Dhuhr time and it has its own iqamah time, set by the mosque.

3. Discover – find a mosque

1. Open the **Discover** tab and search by name or place, or tap **Near me** and choose a distance (5, 10, 25 or 50 km).
2. Filter by mosque type using the chips below the search bar.
3. Tap a mosque to see its full timetable, location, **announcements** and contact details (president and secretary).

4. Favourites

- Tap the **heart** on a mosque to add it to **Favourites**. The **Favourites** tab lists all of them.
- Mosque cards on Home, Favourites and Discover look the same: name, place and type.

5. Map

- Green markers are mosques registered on Mosque Prayer (tap for the timetable).
- Blue markers are mosques listed on Google Maps that are not on Mosque Prayer yet. Tap

one to open Google Maps or get directions.

Move the map and tap **Search this area** to load more mosques. Allow location access to centre the map on you.

6. Notifications – iqama reminders

- Tap the **bell** at the top right to open your notifications.
- For your Home Mosque and your favourite mosques, the app reminds you a few minutes before each iqamah. The number of minutes is chosen by each mosque.
- Allow notifications when the app asks. If reminders do not appear, check that the app is allowed to send notifications and to run alarms in your phone settings.

7. Announcements

Mosques post news (for example Eid timings or classes). Open a mosque and read **Announcements** above the contact details. Pinned announcements are shown first.

8. Free and Pro mosques

A small advertisement may appear on pages of mosques on the Free plan. Mosques on the Pro plan show no advertisements.

9. Troubleshooting

Problem	What to do
Times look wrong	Check your phone's date, time and time zone are set to automatic.
No blue markers on the map	Zoom in (areas larger than about 100 km are not searched) and tap Search this area .
No reminders	Set a Home Mosque or favourite, allow notifications and exact alarms, and make sure the mosque has reminders turned on.
Cannot sign in	Use Forgot password on the sign-in page.
